

# UVMILK® FILTERS FOR WHOLESALE BUYERS

UVMILK® company has been specializing in the production of food and technical filters from primary polypropylene for 17 years. Thanks to our own scientific and technical base, as well as modern equipment, our company develops new technologies and improves existing ones for metalworking and aerodynamic extrusion of polypropylene, which are quite popular in the manufacturing and processing industries.

## IF YOU face one/several of these situations :

- low profit from the sale of goods,
- inconvenient conditions of suppliers,
- low demand for goods,
- no unique offer to clients,

- high demand all year round,
- new unique products,
- marketing support and training,
- availability of the entire range in stock,
- special orders on time

## MILK FILTRATION SOLUTIONS

Increase your profits and expand your end-customer base through profitable cooperation with the UVMILK® brand, which guarantees 50% of your profitability from the entire range of filters and 25% from housings, with steadily increasing demand due to the innovation and efficiency of UVMILK® filter technologies.

Increase loyalty and revenue from your loyal customers, improving the quality of your services by improving the filtration process for end customers using a wide range of customized UVMILK® solutions with minimal time and prices.

Increase the number of products in demand in the product range and meet the needs of your customers by expanding the range with reliable, simple and easy-to-use UVMILK® filters with a wide range of technical characteristics, as well as flexible terms of cooperation.

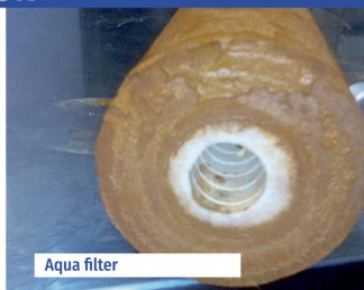

### FEEDBACK FROM WHOLESALE BUYERS OF UVMILK® FILTERS

*«We have been working with the company since 2017, sales of UVMILK® products are increasing from year to year, which brings us additional profit. A reliable and stable supplier. We are confident in the quality of the products we sell, and this is an additional "brick" in strengthening cooperation with our partners.» Trading House "SnabTorgMol»*

## SOLUTIONS FOR FOOD AND TECHNICAL FILTRATION

By purchasing UVMILK® food and technical filters, you will enter new markets and begin to earn additional profits by expanding the product line with filters for the food processing and petrochemical industries, as well as be able to meet the needs of your customers in the filtration of auxiliary liquids and media by offering them a large selection of filters at a competitive price.

Aqua filter

Fuel filter

Chemical filter

Sanitary products

By purchasing sanitary towels, napkins, cloths and UVMILK® chemical filters, you will increase the average receipt of regular customers, as well as expand the customer base through the implementation of filters for the effective cleaning of alkaline and acid detergents and cleaning fabrics for the care of equipment, special equipment and household premises, which are in demand in any production.
